

Web Integration of Dashboard and Story

Review

Story

Duration: 2h 30m

Assigned to Shaik Sameer

Description

This section demonstrates how to embed Tableau Dashboards and Stories within a Flask web application to provide interactive, real-time access to heart disease insights. By integrating Tableau’s powerful visualization capabilities with Flask’s lightweight framework, users can explore dashboards directly in a browser, making the analysis more accessible, shareable, and actionable for healthcare professionals, policymakers, and individuals.

Flask Code:

```
from flask import Flask,
render_template
app= Flask(name)
@app.route('/') def home():
return render_template("index.html")
if name=='main':
app.run(debug=True)
```
